WEBSITE: cv.pietrogadaldi.eu

RESIDENCE: Botticino, Italy

LICENCE: Driving licence B

LAST UPDATED: 09/16/2026

PERSONAL PROFILE

I'm a recent graduate of I.I.S. Benedetto Castelli in Brescia, IT and Telecommunications track. I'm looking for a first technical role in systems administration, out of genuine interest in the field.

EDUCATION

Technical Institute Diploma - IT and Telecommunications · 2021 - 2026

I.I.S. Benedetto Castelli, Brescia · 85/100

WORK EXPERIENCE

School work placement (PCTO) - Systems Team · 06/2025 - 07/2025

Servonet srl · Botticino, Italy

- Shadowed the systems team for three weeks
- Installed hardware components in a range of devices
- Installed, updated and configured professional software applications

SKILLS

HANDS-ON SKILLS

PC building and hardware components

Assembling custom desktop computers. Skilled in selecting budget-appropriate and compatible components, installing OS and essential software, and performing hardware troubleshooting, upgrades, or replacements.

Passionate about Technology and Learning

Keeping up with tech trends. I enjoy testing new tools, understanding how systems work, and learning new technologies.

SOFTWARE I USE

Canva ADVANCED

DaVinci Resolve INTERMEDIATE

GitHub INTERMEDIATE

Visual Studio Code INTERMEDIATE

Claude Code INTERMEDIATE

Unreal Editor (UEFN) INTERMEDIATE

Blender BASIC

Photopea BASIC

PERSONAL PROJECTS

Home Server Manager

A LAN web app for cloud backups hosted on a home server: an old laptop running Ubuntu Server reaches a PC with shared folders over SSH/SFTP and gives access to the external drives attached to it, with separate users and permissions. Remote access is protected by Cloudflare Access and restricted to family members only.

Node.js · Express · React · SSH/SFTP · Cloudflare

Omnia Music

My first finished project. A hybrid playlist manager: it puts tracks from YouTube, YouTube Music and audio files uploaded to Google Drive in the same playlist. It's a PWA with accounts and playlists synced through Supabase and hosting on Netlify. It offers features such as Queue, Jam and Lyrics, as well as per-track customisation.

React · Vite · Supabase · PWA omniamusic.netlify.app

UEFN - Fortnite Projects

Game experiences built in the Fortnite ecosystem with the Unreal Editor for Fortnite software: landscape and environment building, game logic and publishing islands on the Epic Games platform. The page collects some of the published projects.

UEFN · Verse · Unreal Engine fortnite.com/@pitttauefn
